Triple Crown for Conamex International as they capture Gold at the CEA Awards

Caps wins for Software Asset Management and Small Business Specialist of the Year at the 2007 Microsoft IMPACT Awards

Toronto, Ontario – November 15, 2007 - Montreal based **Conamex International** announced today that it has won gold in the Best Small Business Solution category at the fifth annual Channel Elite Awards. This award caps wins for both Software Asset Management Solution of the Year and Small Business Specialist of the Year categories at the 2007 Microsoft Partner Program IMPACT Awards exactly one week ago.

The annual CEA Awards recognize Canadian technology partners' and their commitment and leadership by the technology publication industry. CDN - Computer Dealer News, Canada's No. 1 IT channel publication recognizes these individuals and companies and rewards them with the prestigious Channel Elite Award. The Channel Elite Awards has been rewarding solution providers who have distinguished themselves in the IT industry since 2002. CDN awards prizes in seven unique categories to channel partners for delivering innovative and problem solving solutions during the past 12-month period.

The Best Small Business Solution award honors the partner that has created the most innovative and problem solving hardware, networking, online or software-based solution for an organization or department with up to 100 seats using the solution.

Conamex was chosen as the winner for their two fold solution built using Microsoft Groove 2007 to manage IT assets and its ability to synchronize seamlessly with Microsoft Sharepoint Server, that also addresses several areas of concern for Quality Control departments including collaboration, workflow, document integrity, security and retention.

"We are extremely honored to receive the CEA award as recognition from the IT publication industry, one that sees unique and exciting technology solutions on a daily basis. It also recognizes the innovation and team work at Conamex as well as the solid support we receive from our industry partners" said Elisabeth Vanderveldt, VP Business Development. "These solutions can be replicated in so many industries where IT assets or quality control departments exist. That these solutions can be easily scaled to support other departments and requirements is a huge cost savings advantage for clients and for Conamex, as we deal with a wide spectrum of industries".

Conamex was last year's CEA gold winner for Best Small Business Solution. Conamex has accumulated awards for the last 4 years running. In 2006 they were the winners of the Microsoft World Partner Conference Award for Licensing Technology Solution of the Year.

Conamex, along with other technology partner winners and finalists in each of the award categories, were honored at a gala event in Toronto on November 14, 2007.

About Conamex International:

Conamex International provides strategic consulting, deployment and management of technology services, working in partnership with its clients to define, resolve and execute the required solution for their particular business and technology challenges. Conamex specializes in collaboration, mobility, data management, asset management, infrastructure and security technologies.
